## Profile

---

I build scalable AI Solutions with custom Frontend Ui and integrate automation workflows using **n8n**, **Make**, and **Zapier**, specializing in **Gohighlevel** CRM implementations to deliver scalable, end-to-end solutions for business operations.

## Professional Experience

---

2025/06 – Present  
remote

### Frontend Engineer | Automation Expert

*Postsiva* [🔗](#)

- Design and develop high-performance web applications using modern frontend technologies.
- Automate business processes and workflows using Gohighlevel to enhance operational efficiency.
- Collaborate with cross-functional teams to deliver seamless user experiences and innovative solutions.
- Stay up-to-date with the latest industry trends and technologies to continuously improve skills and deliver exceptional results.

2025 – Present

### Freelance AI & Automation Developer

*Self-Employed | Remote*

- Built an **AI-powered e-commerce assistant** for a Shopify store enabling order tracking and personalized product recommendations using Make.com [🔗](#), Typebot, and Shopify APIs.  
**Demo link** [🔗](#)
- Developed an **AI-driven finance newsletter automation platform** using Next.js, n8n, Supabase, and OpenAI that scrapes finance articles, generates CFO-level summaries, and distributes newsletters automatically via Brevo API.  
**Demo Link** [🔗](#)

## Projects

---

### Postsiva [🔗](#)

*Nextjs + Fastapi + Redis + Vercel*

Postsiva is an AI-powered social media automation platform that helps businesses manage multiple social accounts from one dashboard. It enables users to generate AI-based content, schedule posts across platforms, and maintain consistent online presence.

### AI-Powered LinkedIn & X Content Automation System [🔗](#)

*Nextjs+supbase+n8n,, OpenAI API+AI Content Generation + LinkedIn API + X Developer API*

Developed a SaaS platform that automates social media content creation by combining competitor analysis, AI-generated posts, and lead magnet generation for LinkedIn and X (Twitter).

- Built a **full SaaS frontend dashboard using Next.js and TypeScript** enabling users to manage posts, track competitors, analyze their content, and generate new posts through an intuitive UI.
- Developed an **automation workflow using n8n** that performs competitor analysis to identify high-performing post formats, hooks, and engagement patterns.
- Implemented **AI-powered content generation** to create optimized LinkedIn posts and X threads based on user positioning, niche, and target audience.
- Built **lead magnet automation**, generating resources such as checklists, frameworks, guides, and templates aligned with post topics.

- Integrated **Notion API** to automatically create structured lead magnet documents and generate shareable links.
- Implemented **AI image generation** to create visuals aligned with the content theme and social media style.
- Designed a **centralized asset storage system** to organize posts, images, lead magnets, and metadata for future reuse.
- Enabled **manual and scheduled workflow triggers**, allowing automated content production multiple times per week.

## Education

---

2020 – 2023	<b>Diploma in Computer Information Technology</b>
Lahore	<i>Pak Polytechnic Institute</i>
2023	<b>BS Computer Science</b>
Lahore	<i>Virtual University</i>
